

Job offer

„Help to prevent dementia“

Information Security Analyst

Location // Magdeburg, Germany

Field // digital health

Experience level // junior || intermediate || senior

Start // from now

Contract // full-time || part-time

About us

Every 3 seconds someone in the world develops dementia. With an ever-aging population the number of people who suffer from dementia will double by 2030 and more than triple by 2050. The World Health Organization calls dementia a public health priority. However, currently there are no therapies or drugs on the market.

neotiv is a team of scientists, developers and technically passionate people that share a vision to prevent and intervene dementia. We have created a software system to detect early signs of dementia to enable early intervention of the disease. neotiv is a proud spin-off from Otto-von-Guericke-University Magdeburg in close collaboration with the German Center for Neurodegenerative Diseases (DZNE). We are funded by renown investors and science transfer grants that enable us to realize our mission to improve people's lives. Therefore, we are looking for a passionate Information Security Analyst who supports our vision and helps securing our company.
